Advanced course in gynecological ultrasound, Malmö, Sweden 9-13/4 2018

(NF18028)

I had the pleasure of attending the "Advanced course in gynecological ultrasound" in Malmö, Sweden, during 9-13th of april 2018. The course was led by prof. Lil Valentin and Doc. Povilas Sladkevicius and Dr. Ligita Jokubkiene. There were attendants from many different countries, most of them from Sweden, Norway and Finland, but also as many as ten colleagues from the Philippines. Over these five long and tough days there was a combination of lectures and live ultrasound sessions. The lectures were mainly of high quality and the live ultrasound demonstrations were well executed and with impressive technique. We could see how the ultras scanner found deep endometriosis nodules and how one can visualize the ureteres and the bowl in the way I didn't even imagine before attending this course. In the end of the course I passed the IOTA-test and can now safely use the IOTA methods.

I would highly recommend this course to anyone who wants to expand their knowledge on gynecological ultrasound. The next course will be run at 21st-25th January 2019.

Yours sincerely

Pia Sillanpää
