

## **ENTOG 2022, report by Emma Roos**

This year I have attended the ENTOG exchange program. I spent three days experiencing the work life at the Obstetric/Gynecology clinic in the hospital of Lillehammer, learning about differences and similarities of how we work in Sweden. I then travelled to Oslo to attend the ENTOG Scientific meeting, spending an interesting day listening to lectures and participating in training for delivery in breech presentation. I also attended the ENTOG social program where I met OB/Gyn trainees from all over Europe.
