Certification of Clinical and Research Visit

This confirms that Dr. Hana Shabana was on a two-week clinical and research visit at the Recurrent Pregnancy Loss (RPL) Unit at Copenhagen's Hvidovre Hospital from 2024-12-02 to 2024-12-13.

Dr. Hana Shabana acquired an understanding of the clinic's clinical practices and our ongoing research on recurrent pregnancy loss (RPL) during this time. An in-depth comprehension of the COPL study and the ongoing research initiatives in the field of RPL was a component of the visit. The primary activities that were conducted during this visit were as follows:

- Observing interactively the clinical treatment and investigative strategies for patients with the diagnosis of RPL.
- Participated in the national RPL multidisciplinary team conference, discussing challenging RPL cases.
- Participation in patient consultations, including those enrolled in intervention studies for investigation, treatment, and follow-up.
- Review of the research design, progress, and challenges in the ongoing research and RPL management.
- Interacting with the fertility group for broader aspects of patient care and fertility treatment in the clinic.

Working in conjunction with the research team to acquire a deeper understanding of the design, data collection, and execution of clinical trials in the field of RPL.

With warm regards,

Henriette Svarre Nielsen, MD, DMSc
Chair Professor Ob&Gyn, Dept of Medicine, University of Copenhagen
Consultant and Head of Recurrent Pregnancy Loss Unit
