

Short report to the NFOG from Hanne Mørch concerning NF-number 473:

A two months clinical visit to Fetal Medicine Center, Rigshospitalet, Copenhagen, autumn 2023

I had a successful and very educative 2 months stay at the Fetal Medicine Center in Copenhagen from the beginning of September until the end of October 2023. The main goal for the visit was to get more experience in invasive fetal procedures. I was working with very competent colleagues in a nice and including teaching environment. I was happy to work at the fetal medicine outpatient clinic on daily basis, and always prioritised for all invasive procedures. It was a very inspiring stay. I learned a lot both in invasive fetal medicine, but also how to work even better together as a team of invasive fetal medicine specialists, which is the main goal of NordFetal. I hope to be able to do a similar stay at a later occasion.
