

Report NFOG fund grant for scientific Meeting INOSS Canada May 2024

Outi Äyräs and Reetta Varpula

We wish to thank NFOG board for grants that covered our attendance in a scientific meeting of INOSS (International Network of Obstetric Survey Systems) in Hamilton, Canada, May 14th-16th 2024.

There were 32 participants altogether from 11 countries. The collaboration started at 2010 and has spread from Europe to North America, Africa, and Asia.

We also had a meeting with the Nordic participants for the NOSS (Nordic Obstetric Surveillance System).

Attached is the meeting agenda. As you can see, many topics of Obstetric Surveillance Systems were covered. We enjoyed fruitful discussions with other scientists and learned a lot from surveillance systems for the future.

Helsinki August 26th
