

Ultrasound Course Report – Financial Aid Reimbursement (NFOG Grant)

To Whom It May Concern,

I am writing to briefly summarize the educational activity I attended with the support of an NFOG grant.

Course Title: *ISUOG Advanced Course in Gynecological Ultrasound*

Organizer: International Society of Ultrasound in Obstetrics and Gynecology (ISUOG)

Date: January 2025

Location: Malmö, Sweden

This advanced course provided a comprehensive and current overview of gynecological ultrasound, focusing on key topics such as adnexal masses, endometriosis, pelvic pain, uterine anomalies, and advanced Doppler techniques. The program included expert-led lectures, interactive case discussions, and image interpretation sessions, all of which contributed to a deeper understanding of diagnostic challenges and clinical applications in gynecological imaging.

As part of the course, I also completed the requirements for **IOTA (International Ovarian Tumor Analysis) certification**, which enhances my ability to evaluate adnexal masses using standardized and evidence-based ultrasound criteria.

Attending this course has been an important step in my continuing professional development. The knowledge and skills gained will support my clinical work and ultimately benefit the quality of care provided to my patients.

I am very grateful for the support provided by the NFOG grant, which made my participation in this course possible.

Sincerely,

Annina Haverinen, MD, PhD

Helsinki, Finland
